## Introduction

Thumb art is simple and fun.  
No one else in this big wide world has a thumbprint like yours.  
Your thumbprint is unique.

For making these thumbprint drawings you will need an ordinary inkpad and a black sketch pen. For making colour thumbprints you can also use paint. Remember to wash your hands with soap and water after finishing the activity.

Things to remember:

1. Try not to press your thumb too hard otherwise instead of a nice whorl you might get a smudge.
2. Don't use too much or too little ink. With little ink the thumbprint will be faint and with too much ink you will hardly see the whorls.
3. Draw on the thumbprint first with pencil and as you gain confidence draw straightway with a sketch pen.
4. You can use different colours of sketch pens. This will make the thumb drawings look very beautiful.

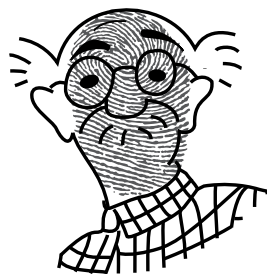

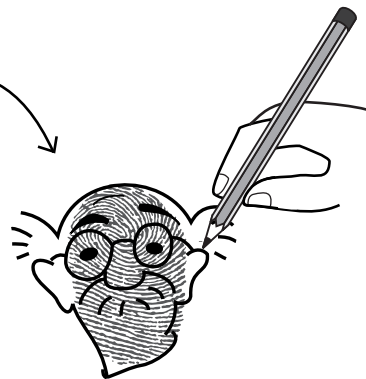

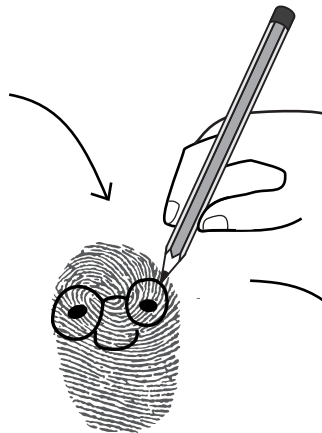

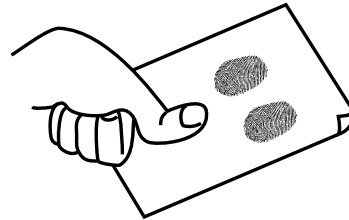

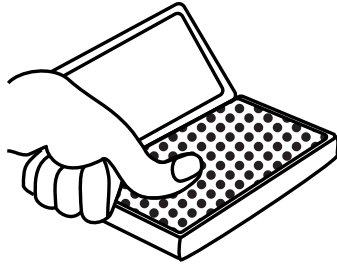

At the end of the book there are a few pages with only thumb impressions. So, even if you don't have the inkpad at hand you can straightaway have a go at them.

Happy Painting!

## BLANK THUMBPRINTS FOR PRACTICE

Thumb art is simple and fun. First make a few thumbprints on a piece of plain paper. Use your thumbprint as a base and try making simple pictures with a pen. A small beak, a tail and two legs will magically transform the thumbprint into a simple bird. The possibilities are endless. Slowly, from simple figures you can graduate to making complicated pictures using several thumbs at one go. Later, you will be able to make exquisite animals, people, household objects and even dinosaurs.
